Getting Started

**Accessing WestlawNext Campus Research**
Click the WestlawNext Campus Research icon on the computer desktop. A user agreement is displayed. After you read and accept the terms of the agreement, choose I Agree and click Continue. The WestlawNext home page is displayed (Figure 1).

**Content and Searching**
You have access to all of the WestlawNext content included in the library’s subscription. Documents that are not available are marked Out of Plan. At the WestlawNext home page, you can use the text box at the top of the page to search for documents or retrieve a document using its citation or name. You can also browse content by clicking the links on the tabs. For assistance using WestlawNext, click Help at the bottom of any page to see helpful reference materials.

**Signing off from WestlawNext Campus Research**
To end your WestlawNext Campus Research session, click Sign Off at the top of any page.

Figure 1. WestlawNext home page
Using the Home Page

WestlawNext simplifies your starting point for legal research. At the home page, you can use the search box at the top of the page to find a document by citation or name or search for documents. You can also browse content using the links in the Browse section.

Retrieving Legal Documents by Citation

Most legal authority, such as a court decision, statute, or administrative regulation, has a citation; that is, a unique reference to the document. If you have a citation, type it in the search box at the top the page and click Search.

For example, to retrieve the 2010 Supreme Court decision *Citizens United v. Federal Election Commission*, which has a citation of 130 S.Ct. 876, type 130 sct 876 in the search box and click Search (Figure 2).

To find multiple documents by citation, type the citations in the text box separated by semicolons and click Search. For example, type 127 sct 2162; 93 sct 705.

To retrieve a statute, for example, section 2614 of the Family and Medical Leave Act, which has a citation of 29 U.S.C.A. § 2614, type 29 usca 2614 in the search box and click Search. To retrieve a state statute such as section 56.21 of the *California Civil Code*, which has a citation of Cal. Civ. Code § 56.21, type cal civ code 56.21 and click Search.

Retrieving Case Law Documents by Name

You can also retrieve court decisions by party name. To retrieve a case by party name, type one or more parties’ names or the case title in the text box and click Search. For example, type roe v. wade.

Figure 2. Retrieving a Case by Citation
Researching a Legal Issue

When you run a search on WestlawNext, you don’t need to select a database. Your search is automatically run across the following eight core content categories:

- Cases
- Statutes and Court Rules
- Regulations
- Administrative Decisions and Guidance
- Secondary Sources
- Briefs
- Proposed and Enacted Legislation
- Proposed and Adopted Regulations

The core content categories that will be most helpful for your research include Cases, Statutes and Court Rules, and Regulations. Following are brief descriptions of these categories:

- **Cases** are the written opinions of appellate and lower court judges.
- **Statutes** are laws passed by a state legislature or the United States Congress.
- **Court rules** have the force of law and govern practice and procedure in the various courts. Examples include the Federal Rules of Evidence as well as any local rules that a court issues.
- **Regulations** include state and federal agency regulations such as the Code of Federal Regulations.

To search for documents, follow these steps:

1. Type search terms describing your issue in the search box at the top of the page (Figure 3). If you are familiar with Boolean searching, you can also type a Terms and Connectors query. WestlawNext recognizes whichever search format you use.

2. Leave the default jurisdiction or click the arrow to display the Jurisdiction selector. Select up to three jurisdictions and click Save (Figure 4).

3. Click **Search**.

WestSearch, the WestlawNext search engine, examines all core legal content for the jurisdiction you choose. Core content comprises cases, statutes and court rules, regulations, federal administrative materials, U.S. Supreme Court briefs, and secondary sources. The result is organized by content category, with the most relevant documents listed first.
Searching with Boolean Terms and Connectors

At the WestlawNext home page, you can search for documents by typing a Boolean terms and connectors search query. The Boolean search method allows you to enter a query that consists of key terms from your issue and connectors specifying the relationship between those terms. For example, you can specify that your terms appear in the same sentence (/s) or the same paragraph (/p). Type your query in the search box at the top of the home page, change the jurisdiction if necessary, and click Search.

To run a Boolean terms and connectors search, choose terms significant to your issue. Consider the various forms the search terms might take.

- To search for words with multiple endings, use the root expander (!). For example, type object! to retrieve object, objected, objection, and objecting.
- To search for words with variable characters, use the universal character (*). For example, type withdr*w to retrieve withdraw and withdrew.
- To search for a word exactly as you typed it, use the pound symbol (#). For example, type #damage to retrieve damage but not damages.

In addition to choosing terms for your query, choose proximity connectors to specify the relationships between your search terms.

- The /p connector requires search terms to appear in the same paragraph in a document (hearsay /p utterance)
- The +p connector requires the first search term to precede the second term within the same paragraph
- The /s connector requires search terms to appear in the same sentence in a document (design /s defect)
- The +s connector requires that the first term to precede the second term within the same sentence (attorney +s fee)
- The /n numerical connector requires search terms to appear within a specified number of terms of each other (personal /3 jurisdiction)
- The +n numerical connector requires that the first term precede the second term by no more than the specified number of terms (elena +2 kagan)
- The BUT NOT connector (%) allows you to exclude documents that contain the terms typed after the BUT NOT connector. For example, the query damages % negligence retrieves documents that mention damages while excluding documents with the word negligence.

You can also use field restrictions to search for terms in specific parts of a document. Documents on WestlawNext are composed of several parts called fields. For example, in case law documents the names of the parties, the name of the judge, and the names of the attorneys are each contained in separate fields. Available fields vary by content type, so even though you can add field restrictions to any Boolean terms and connectors query, it is best to use field restrictions on the Advanced Search page.
Using Advanced Search for Legal Content

Click advanced on the home page to access a template (Figure 5) in which you can build a Boolean terms and connectors search query. Type your terms in the appropriate text boxes, click the arrow under Jurisdiction if you want to change the jurisdiction, and click Search. While viewing the search result, you can edit your search in the search box at the top of the page or by clicking advanced again.

Use the text boxes at the top of the page under Find documents that have to do any of the following:

- If you want all of the terms included in your retrieved documents, type them in the All of these terms text box.
- If you want any of the terms included in your retrieved documents, type them in the Any of these terms text box.
- If you want an exact phrase included in your retrieved documents, type it in the This exact phrase text box.

If you want to exclude documents that contain certain terms, you can do so in the Exclude Documents that have section. Type the terms in the These terms text box.

The Advanced Search page enables you to search for terms within specific parts of a document. The fields displayed at an Advanced Search page vary by content category. For example, if you click advanced at the home page, the Advanced Search page displays a date, citation, and name/title field. If you click advanced at the Cases page, the Advanced Search: Cases page displays fields such as party name, synopsis, digest, judge, and attorney. If you click advanced at the Statutes and Court Rules page, the Advanced Search: Statutes and Court Rules page displays fields such as caption, statutory text, and annotations.

Selecting Specific Content to Search

To select specific content to search, click a tab, such as State Materials, in the Browse section at the home page. Then click a content category, such as Ohio. A corresponding tabbed text box is displayed at the top of the page. Type your search in this text box, change the jurisdiction if necessary, and click Search.

Browsing Content

In addition to running a search, you can use the Browse feature to retrieve documents. Simply click the category links on the tabs in the Browse section. See the “Searching Cases” and “Searching Statutes” sections below for more information.
Sorting Your Documents

By default, documents are ranked by relevance. To change the default ranking, choose an option from the Sort by drop-down list at the top of the center column.

Customizing the Results Display

- Click the Details icon (⋯) at the top of the result page to choose from three levels of detail. The type of detail varies by document type.
- To change the number of documents that are displayed at the result page, choose a number from the drop-down list at the bottom of the page.

Narrowing a Search Result

After you select a content category at the result page, you can narrow your search result using filters under Narrow in the left column (Figure 7). To select more than one filter to apply at the same time, first click Select Multiple Filters, then select the filters you want to add and click Apply Filters. To undo all filters you have added, click Undo Filters under Narrow.

Searching Within Results

You can narrow a search result by searching for terms within the result. Type your Boolean terms and connectors query in the Search within results text box under Narrow in the left column and click Search. Both your original search terms and the terms used to narrow your result are highlighted in different colors in the documents. To undo a search within a result, click Undo search within in the left column.
Browsing Documents in a Search Result

To view a document in your search result, click the document’s title. Each document contains highlighted search terms for easy browsing and links to cited documents.

On the document toolbar for a case, you can do any of the following (Figure 8):

- To view the result list, click **Return to list**.
- To view the next or previous document in the result, click the **Results** arrows.
- To view the portions of each document that contain your search terms, click the **Search term** arrows.
- To jump to a specific portion of a case, click the **Go to** arrow and choose an option such as **Headnotes** from the menu.

Filtering Search Results

You can also narrow a search result by selecting other filters under **Narrow**. Filters vary by document type. For example, the filters available for cases include jurisdiction, date, reported status, topic, judge, attorney, law firm, key number, party, and docket number. Select the filters you want and click **Apply Filters**. To undo all filters you have added, click **Undo Filters**.

![Figure 7. Filters at a result page](image1.png)

**Browsing Documents in a Search Result**

![Figure 8. Case law document in a search result](image2.png)
Returning to Prior Research

You can return to your previous work at any time during your research session. Point to History at the top of any page. A list of the five most recent documents you have viewed and searches you have run is displayed. Your history is available until the end of your research session (Figure 9).

Figure 9. Prior research listed in History
Searching Cases

What Is a Case?

Cases are the written opinions of appellate and lower court judges. Appellate courts are courts that have the authority to review decisions of lower courts. Opinions from appellate courts can be crucial to understanding a legal issue because these opinions determine how lower courts decide similar issues in the future. Federal and state appellate court opinions and federal lower court opinions are on WestlawNext.

Note that for most state courts, it is unusual for lower or trial court decisions (as opposed to the appellate decisions described above) to be published, either online or in print. This means that even if a trial court decision is in the news because of an unusual ruling or a large award of damages, it may not be on WestlawNext.

What Are Editorial Enhancements?

Court decisions published in West’s National Reporter System feature several editorial enhancements created by Thomson Reuters attorney-editors. These enhancements help you understand the significance of the case and help you retrieve cases that discuss a particular point of law.

• **Synopsis.** A synopsis is a paragraph-length summary of the facts and the main legal issue in a case. Read the synopsis of a case you’ve retrieved to get a quick understanding of what the case was about and how a legal issue was decided by the court. You can add a synopsis field to your advanced Boolean search to retrieve only cases that contain a specific term in the synopsis field.

• **Headnotes.** Headnotes are short summaries of each legal issue discussed in the case. Because the headnotes are succinct expressions of the legal issues raised by the interaction of the facts in a case and the rules of law, you can efficiently search for key terms by adding a headnote field to your advanced Boolean search to retrieve only cases that contain a specific term in the topic or headnotes field.

• **West Topic and Key Numbers.** Each headnote is classified under one or more topics and key numbers in the West Key Number System, which Thomson Reuters editors use to index case law. You can add a topic field to your advanced Boolean search to focus your legal research on particular issues.
Finding Cases by Citation or Name

To find a case by citation or name, do one of the following:

- To find a case by citation, type the citation in the search box at the top of the page and click **Search**. For example, type *127 sct 2162*.
- To find multiple cases by citation, type the citations, separated by semicolons, in the search box and click **Search**.
- To find a case by party name, type one or more parties’ names or the case title in the search box, change the jurisdiction if necessary, and click **Search** (Figure 10). For example, type **rumsfeld v. hamdan**.

![Figure 10. Finding a case by party name](image)

Searching for Cases

To search for cases, follow these steps:

1. Type terms describing your issue in the search box at the top of the page. If you are familiar with Boolean searching, you can also type a Terms and Connectors query. WestlawNext recognizes whichever search format you use.
2. Leave the default jurisdiction or click the arrow to display the Jurisdiction selector. Select up to three jurisdictions and click **Save**.
3. Click **Search** to search all core legal content, including cases.
**Browsing Cases**

In addition to running a search, you can use the Browse feature to retrieve cases. Click the category links on the tabs in the Browse section on the home page. You can retrieve cases in several ways from the Browse section:

- Click the All Content tab, then click **Cases** to display the Cases page (Figure 11), which organizes cases under Federal Cases by Court, Federal Cases by Circuit, Cases by State, Cases by U.S. Territory, and Cases by Topic. Click the appropriate links to retrieve the cases you want.

- Click the Federal Materials tab to retrieve U.S. Supreme Court cases or cases from federal courts in a specific circuit or state.

- Click the State Materials tab to view a list of states. Click a state name to retrieve cases from state or federal courts in that state.

When you click a link for a specific court, such as **U.S. Supreme Court**, a list of the 10 most recent cases from that court is displayed (Figure 12). A corresponding tabbed text box is displayed at the top of the page. You can search all cases from the court by typing a search in this text box and clicking **Search**.

![Figure 11. Cases category page](image)

![Figure 12. List of recent U.S. Supreme Court cases](image)
Viewing a Search Result

Result Page

After your search is run, the result page is displayed (Figure 13). (If an overview of your search result is displayed, click Cases in the left column to view the result page for cases.) The result page lists the citations of cases retrieved by your search and shows your highlighted search terms in context. The result page contains three columns:

- The left column lists the core content categories as well as available filters.
- The center column lists all the cases in your search result.
- The right column lists a sampling of related documents from the Secondary Sources and Briefs content categories.

Result Page Options

- By default, cases are ranked by relevance. To change the default ranking, choose an option from the Sort by drop-down list at the top of the center column.
- Click the View Detail icon ( ) at the result page to choose from three levels of detail. The type of detail may include the case title and citation, search terms in context, and a case summary.

![Figure 13. Cases result page](image-url)
Narrowing a Search Result

You can narrow your search result using the filters in the left column (Figure 14). To select more than one filter to apply at the same time, first click Select Multiple Filters, then select the filters you want to use and click Apply Filters. To undo all filters you have added, click Undo Filters under Narrow.

Searching Within Results

You can narrow a search result by searching for terms within the result. Type a Boolean terms and connectors query in the Search within results text box under Narrow in the left column and click Search. Both your original search terms and the terms used to narrow your result are highlighted in different colors in the cases. To undo a search within a result, click Undo search within in the left column.

Filtering Search Results

You can also narrow a search result by selecting other filters under Narrow. Filters available for cases include jurisdiction, date, reported status, topic, judge, attorney, law firm, key number, party, and docket number.

Figure 14. Filters at cases result page
Browsing Cases in a Result

To view a case in your search result, click the case’s title. Each case in a search result contains highlighted search terms for easy browsing and links to cited documents. On the document toolbar for a case, you can do any of the following (Figure 15):

- To view the result list, click Return to list.
- To view the next or previous document in your search result, click the Results arrows.
- To view the portions of each document that contain your search terms, click the Search term arrows.
- To jump to a specific portion of a case, click the Go to arrow, and choose an option such as Headnotes from the menu.

![Figure 15. Case](image)
Checking Cases in KeyCite

Use KeyCite, the citation research service, to help determine whether a case is good law and to retrieve documents that cite the case. KeyCite covers every case in West’s National Reporter System and more than 1 million unpublished cases. There are several ways to access KeyCite information:

- While viewing a case with a KeyCite flag, click the flag.
- While viewing any case, click one of the following tabs at the top of the page: Negative Treatment, History, or Citing References.
- Type \texttt{kc:} or \texttt{keycite:} followed by a citation in the search box at the top of the page and click Search. For example, type \texttt{kc: 93 sct 1817} or \texttt{keycite: 93 sct 1817}.

KeyCite Status Flags for Cases

If a case has a red or yellow flag, the most negative treatment is displayed next to the flag at the top of the case (Figure 16). Most negative treatment consists of phrases such as Overruled by, Abrogated by, or Distinguished by and includes a link to the underlying document, if available. These flags tell you that you should not rely on the case.

- A red flag warns that the case is no longer good law for at least one of the points of law it contains.
- A yellow flag warns that the case has some negative history but has not been reversed or overruled.

Figure 16. Case showing most negative treatment
Viewing Negative Direct History and Negative Citing References for a Case

Click the **Negative Treatment** tab to view negative direct history and negative citing references for a case (Figure 17). Negative citing references are displayed in a table format. The depth of treatment bars in the **Depth** column indicate the extent to which citing cases discuss the cited case, and the headnote numbers in the **Headnotes** column indicate which headnotes in the cited case contain the points of law discussed by the citing cases.

![Figure 17. Negative Treatment tab](image)

Viewing the History of a Case

Click the **History** tab to view the direct history of a case and related references. The cases included in the direct history and related references are listed in the left column. Direct history is also displayed in a graphical view in the right column. You can restrict direct history by choosing an option from the **View** drop-down list.

Viewing Citing References for a Case

Click the **Citing References** tab to view a list of cases, administrative materials, secondary sources, briefs, and other court documents that cite your case. To change the order in which the citing references are displayed, choose a date or depth of treatment option from the **Sort By** drop-down list on the toolbar.

To narrow the list of citing references, you can

- type terms in the **Search within results** text box in the left column.
- click a document type in the left column, such as **Secondary Sources**. You can further narrow this list by selecting a filter under **Narrow** in the left column, such as **Jurisdiction**.
**Searching Statutes**

**What Is a Statute?**
A statute typically refers to a law passed by a state legislature or the U.S. Congress. State and federal court cases often involve statutory interpretation, and enactment of a statute may well reverse established case law.

**Federal Statutes**
After the U.S. Congress passes a bill and the president signs it into law, it is codified, or published in, the *United States Code* (USC), the official version of federal statutory law. Since 1927, West has published an annotated version of the USC, the *United States Code Annotated* (USCA). Each statute in the USCA is followed by summaries of published court decisions that interpret the statute. These summaries are also called annotations or notes of decisions. The complete USCA is available on WestlawNext.

**State Statutes**
State laws are codified, or published in, state legislative codes. Statutes from all 50 states and the District of Columbia are available on WestlawNext.

**Finding Statutes by Citation**
To retrieve a statute by citation, type the citation in the search box at the top of the page and click Search. For example, type 29 usca 2614 or cal civ code 56.21.

**Searching for Statutes**
To search for statutes, follow these steps:
1. Type terms describing your issue in the search box at the top of the page. If you are familiar with Boolean searching, you can also type a Terms and Connectors query. WestlawNext recognizes whichever search format you use.
2. Leave the default jurisdiction or click the arrow to display the Jurisdiction selector. Select up to three jurisdictions and click Save.
3. Click Search to search all core legal content, including statutes.
Retrieving Statutes Using the Table of Contents Service

You can use the category links in the Browse section of the home page to retrieve statutes using the Table of Contents service. The Table of Contents service lets you browse statutes, view a statute in the context of the sections surrounding it, and quickly retrieve related sections.

An easy way to access the Table of Contents service is by clicking the All Content tab, then clicking Statutes and Court Rules to display the Statutes and Court Rules page (Figure 18). Click United States Code Annotated (USCA) to display the table of contents for the United State Code Annotated (USCA) (Figure 19), or click a state name to display the table of contents for that state's statutes and court rules.

To browse a table of contents, click the links. To retrieve a specific section, click its name.

To run a search, select Search all content, or select Specify content to search and select the check boxes next to the sections, titles, parts, or subparts you want to search. Then type your search in the tabbed search box at the top of the page and click Search.

Linking to Other Tools and Resources

While viewing a table of contents, you can click links under Tools and Resources in the right column to access other useful materials, including

- an alphabetical statutes index
- a popular name table
Retrieving Statutes Using an Index

You can use an alphabetical index to retrieve statutory sections on a specific topic. While viewing the table of contents for the USCA or a state’s statutes, click the Index link in the right column. Browse the index by clicking the letters at the top of the page (Figure 20). You can also type a word or phrase in the search box. For example, type adoption and click Search. A list of topics containing the term is displayed (Figure 21). Click a topic to view the relevant sections. To retrieve the full text of a section, click its citation.

Retrieving Statutes Using the Popular Name Table

When you know the popular name of an act, you can use the popular name table to retrieve the statute sections under which the act is codified. While viewing the table of contents for the USCA or a state’s statutes, click the Popular Name Table link in the right column to display the popular name table, which lists the acts in alphabetical order. To see the statutory sections under which an act is codified, click the act’s name or the citation next to the name.
Viewing a Search Result

Result Page

After your search is run, the result page is displayed (Figure 22). (If an overview of your search result is displayed, click Statutes in the left column to view the result page for statutes.) The result page lists the citations of statutes retrieved by your search and shows your highlighted search terms in context. The result page contains three columns:

• The left column lists the core content categories as well as available filters.
• The center column lists all the statutes in your search result.
• The right column lists a sampling of related documents from the Secondary Sources and Briefs content categories.

Result Page Options

• By default, statutes are ranked by relevance. To change the default ranking, choose an option from the Sort by drop-down list at the top of the center column.
• Click the View Detail icon (        ) at the result page to choose from three levels of detail. Details may include the section numbers and names, the major statutory headings, and search terms in context.

Figure 22. Statutes result page
Narrowing a Search Result
You can narrow your search result using the filters in the left column (Figure 23). To select more than one filter to apply at the same time, first click Select Multiple Filters, then select the filters you want to use and click Apply Filters. To undo all filters you have added, click Undo Filters under Narrow.

Searching Within Results
You can narrow a search result by searching for terms within the result. Type your terms in the Search within results text box under Narrow in the left column and click Search. Both your original search terms and the terms used to narrow your result are highlighted in different colors in the statutes. To undo a search within a result, click Undo search within in the left column.

Filtering Search Results
You can also narrow a search result by selecting other filters under Narrow. Filters available for statutes include jurisdiction, effective date, and statute title.

Figure 23. Filters at statutes result page
Browsing Statutes in a Result

To view a statute in your search result, click the statute’s section number or name. Each statute in a search result contains highlighted search terms for easy browsing and links to cited documents. On the document toolbar for a statute, you can do any of the following (Figure 24):

- To view the result list, click Return to list.
- To view the next or previous statute in your search result, click the Results arrows.
- To view the portions of each statute that contain your search terms, click the Search term arrows.
- To view the next and previous sections, even if they were not retrieved by your search, click the arrows to the right and left of the section symbol (§).
- To view the portion of the table of contents containing the statute you are viewing, click Table of Contents.

Figure 24. Statute
Viewing Related Material

Related material is organized on tabs at the top of the displayed statute (Figure 25).

Click the Notes of Decisions tab or click a topic under Notes of Decisions in the right column to view notes of decisions, written by West attorney-editors, which summarize points of law from cases that construe or apply the statute.

Click the Context and Analysis tab to view links to other related materials such as cross-references, library references, and law review and journal commentaries.

To return to the full text of the statute you were viewing, click the Document tab.

Figure 25. Tabs with related material
Checking Statutes in KeyCite

KeyCite information is available for federal statutes and state statutes from all 50 states. Use KeyCite to help determine whether a statute is good law and to retrieve documents that cite the statute.

You can access KeyCite information in several ways:

- While viewing a statute with a KeyCite flag, click the flag.
- While viewing any statute, click the History or Citing References tab at the top of the page.
- Type kc: or keycite: followed by a citation in the search box at the top of the page and click Search. For example, type kc: 29 usca 2614 or keycite: 29 usca 2614.

KeyCite Status Flags for Statutes

If a statute has a red or yellow flag, the most negative treatment is displayed next to the flag at the top of the document (Figure 26). Most negative treatment consists of phrases such as Unconstitutional or Preempted or Proposed Legislation and includes a link to the underlying document, if available. These flags tell you that you should not rely on the statute.

- A red flag indicates that the statute has been amended by a recent session law, repealed, superseded, or held unconstitutional or preempted in whole or in part.
- A yellow flag indicates that the statute has been renumbered or transferred by a recent session law; that an uncodified session law or proposed legislation affecting the statute is available; that the statute was limited on constitutional or preemption grounds or its validity was otherwise called into doubt; or that a prior version of the statute received negative treatment from a court.

Figure 26. Statute showing most negative treatment
Viewing History for a Statute
Click the History tab to view history for a statute, which includes the following categories (Figure 27):

- **Graphical Statute**, which helps you track changes to a statute
- **Validity**, which includes cases affecting the validity of the statute, recent session laws that have amended or repealed the statute, and proposed legislation
- **Versions**, which includes prior versions of the statute
- **Editor’s and Revisor’s Notes**, which summarizes legislative changes affecting the section
- **Bill Drafts**, which includes drafts of bills introduced before a section was enacted into law
- **Legislative History Materials**, which lists committee reports, testimony, and executive messages relevant to the section

![Figure 27. History tab for statute](image)

Viewing Citing References for a Statute
Click the Citing References tab to view citing references for the statute, including cases; statutes; regulations; administrative decisions; secondary sources; briefs; trial court documents; and other documents. To change the order in which the citing references are displayed, choose an option from the Sort By drop-down list on the toolbar.

To narrow the list of citing references, click a document type in the left column, such as Cases. You can further narrow this list by

- typing terms in the Search within results text box in the left column.
- selecting a filter under Narrow in the left column, such as Jurisdiction.
Searching News Content

If your library’s subscription includes news content, you can access it by clicking News on the All Content tab in the Browse section of the home page. The News category page organizes news sources by type, by geographic region (U.S. or international), and by topic (Figure 28).

To search all news content on WestlawNext, type a plain-English description of an issue in the search box at the top of the News category page. WestlawNext runs a natural language search of all news content and retrieves the most relevant documents.

To search specific news content from the News category page, complete one of the following steps:

- Click Publications List in the right column of the News category page to browse an alphabetical index of news sources available on WestlawNext, including newspapers, wire services, magazines, and transcripts of radio and TV programs. Click the title of a news source to view a category page for that title, which lists the 10 most recent items added to the title. To search the title, type a description of your issue in the search box at the top of the page.

- Click a news category, such as Reuters News, U.S. News, or Energy and Environment to view a list of the 10 most recent news stories added to WestlawNext related to that category. Type a description of your issue in the search box at the top of the category page to search all news stories related to the category.

Searching with Boolean Terms and Connectors

You can search for news documents by typing a Boolean terms and connectors search query. The Boolean search method allows you to enter a query that consists of key terms from your issue and connectors specifying the relationship between those terms. For example, you can specify that your terms appear in the same sentence (/s) or the same paragraph (/p). Type your query in the search box at the top of the home page and click Search.
Using Advanced Search for News Content

Use the Advanced Search template to build a Boolean terms and connectors query. To access the template, click advanced on the category page for any news content. Type your terms in the appropriate text boxes and click Advanced Search. While viewing the search result, you can edit your search in the search box at the top of the page or by clicking advanced again.

Use the text boxes at the top of the page under Find documents that have to do any of the following:

• If you want all of the terms included in your retrieved documents, type them in the All of these terms text box.
• If you want any of the terms included in your retrieved documents, type them in the Any of these terms text box.
• If you want an exact phrase included in your retrieved documents, type it in the This exact phrase text box.

If you want to exclude documents that contain certain terms, you can do so in the Exclude Documents that have section. Type the terms in the These terms text box.

In addition to being able to restrict your search by document date, the Advanced Search template enables you to search for terms within specific parts of a document. For example, you can search for terms in the following fields:

• Title (ti): search by title or headline of the news story or article
• Lead Paragraph or Headline (hld): search by the headline and lead paragraphs of a news article
• Publication Name or Source (so): search by the name of the publication or wire service
• Author (au): search by the name of the author, news commentator, or wire service
• Company (com): search by company name
• Geographic Region (geo): search by global region (for example, Latin America), country (for example, Turkmenistan), or state (for example, South Carolina)
• Industry (ind): search by industry (for example, automobile), product (for example, soft drinks), or market sector (for example, agriculture).
• News Subject (ns): search by event (for example, natural disasters), activities (for example, business management), and issues (for example, hate crimes)

The last four fields listed above—Company, Geographic Region, Industry, and News Subject—are examples of index reference codes have been editorially added to News documents on WestlawNext to help searching.

Browsing News Content

Viewing Search Results

After your search is run, the search result is displayed. Click a document title to display the document.

Sorting Your News Documents

By default, documents are ranked by relevance. To change the default ranking to Date, choose the Date option from the Sort by drop-down list at the top of the center column.

Searching Within Results

To narrow a search result by searching within the result, type your Boolean terms and connectors search query in the Search within results text box under Narrow in the left column and click Search. Both your original search terms and the terms used to narrow your result are highlighted in the documents. To undo a search within a result, click Undo search within in the left column.
Printing or Delivering Documents

After you have retrieved a search result on WestlawNext, you can print, email, or download one or more documents or a list of documents. You can also save your print and download requests in the delivery queue until the end of your research session.

To print, email, or download a document or a list of documents, complete these steps:

1. Click the Print (       ), Email (       ), Download (       ), or Kindle (       ) icon on the toolbar, or click the arrow next to the delivery icon and choose Print, Email, Download, or Kindle from the menu.

2. A dialog box is displayed, which includes two or more of the following tabs, depending on the documents you choose to print, email, or download (Figure 29). The options available on each tab will also change depending on what you choose to print.
   - **Basics tab.** This tab is available if you click the Download or Kindle icon or choose Download or Kindle from the menu. Choose to print a list of documents or individual documents. After you make your selection, choose the number of items or documents you want to print from the drop-down list.
   - **Layout and Limits tab.** Use the check boxes and drop-down lists to choose layout elements you want to include in the document, such as dual-column format for cases or an expanded margins for notes.
   - **Content to Append tab.** Select the check boxes for the content you want to append to the document from the KeyCite Lists and Other Related Information sections.
   - **Recipients tab.** This tab is available if you click the Email icon or chose Email from the menu.

3. Click Print, Email, Download, or Send. If you click Print or Download, a Preparing for Print or Preparing for Download dialog box is displayed. To continue your research and print or download your documents at a later time, click Minimize and Continue Researching. Your request will be added to the delivery queue.

Using the Delivery Queue

Print and download requests are saved in the delivery queue in the lower-right corner of the page (Figure 30).

- To display the items in the delivery queue, click the View delivery queue icon.
- To print or download an item in the delivery queue, click the button next to the item.
